Dear friend,

Let me ask you a quick question:

Does this sound familiar?

*"The lure bobs, and suddenly, the line is tugged by the force of a behemoth trout... only to SNAP without warning!"*

If that sounds like you, don't worry, because you are not alone.

The fact is, many other nightmare scenarios - including this one above - have *even* been experienced by some of the MOST accomplished fishermen in the world.

Yes, really...

**"I'm Not Pulling Your Leg... Or Your Line for that Matter!"**

So it's no doubt that you're probably finding yourself stuck in similar situations.

I mean, if this happens to the best of fishermen, then it's obviously gonna' happen to you, right?

But there is no need to worry: All hope is NOT lost.

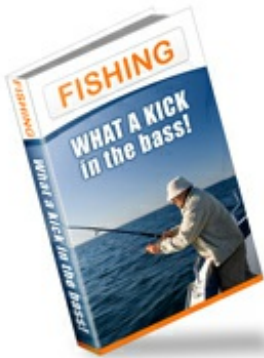

Thanks to a recent breakthrough in the way in which I can distribute this knowledge to you, I am now able to offer you the answers to ALL your fishing problems, in a matter of minutes.

For example: You'll discover things such as the "missing piece" that makes the difference between an amateur without a single bite and a fishermen whose bucket is overflowing with healthy, meaty bass.

You'll also instantly figure out the most important element of fishing.

And if you're not using the right type or size of "this" (you'll find out exactly what "this" is in just a moment) - it can seriously drown your bass-fishing efforts before you even have the chance to get started.

So, if you've ever wanted to learn how to fish like a "master of the reel" then I suggest you waste no time getting started today, as this may be THE most important manual you read this year.

**Because I Like To Over Deliver, And I Want To Make It As Easy As Possible For You To Get All The Info Packed Into the Bass Fishing Techniques Manual, I've Had The Book Recorded Into An Audio Book That You'll Receive As A Bonus With the "Bass Fishing Techniques " Manual.**

As well as the "Bass Fishing Techniques " Manual, you will also receive two audio book versions of "Bass Fishing - What a Kick in the Bass ". One recorded by a male narrator and the other by a female

You can listen to "Bass Fishing - What a Kick in the Bass" in the car on the way to work, or whilst out jogging. Making it easier to get the info packed into it.

Even so, from what you have seen so far, I'm sure you'll agree that I really have outdone myself on this one.

To be perfectly honest, I don't think there is any way you could disagree.

I've covered every angle, every problem, every solution - pretty much everything that you could possibly want to know, or would need to know in the future.

Agree?

I hope so.

But if for some reason, whatever that may be, you can't find yourself to agree with me on this, then I suggest you scroll back up and carefully examine each and every bullet in the list above - IN DETAIL!

## **"Once You Have Done that and You are Satisfied that 'Bass Fishing - What a Kick in the Bass' is UNBEATABLE - Come Back to this Point!"**

Because once you have done that, and once you are MORE than satisfied that I am literally dishing out hundreds of dollars worth of savings-tips, advice and insider knowledge...

...Not to mention the secret tips, tricks and techniques that you NEED to succeed in your mission to be the best at fishing - then, and only then will you appreciate the true value of what I am offering.

Then, and only then, will it completely shock you when I tell you how easy (and cost-effective) it is for you to get your hands on it all - yes, everything!

So, my suggestion is: Spend a good few minutes reading the bullets above...

## **"Bass Fishing - What a Kick in the Bass' is Available Right Here, and Right Now - Nowhere Else! Are You Ready to Make the Move?"**

You'll be surprised to learn that if you want it - you can have it.

In reality, the only thing stopping you, is well... you!

Why do I say that? I'll tell you why.

I've made it not only easy, but *extremely* easy, for you to get your hands on "Bass Fishing - What a Kick in the Bass."

So easy in fact, that you really have no excuse not to.

Firstly, I've made it a snap to get access to - all you've gotta' do is download it.

Once that is done, you are ready to get started right away.

That's what... a minute tops?

Secondly, I've made it well within the "normal" price range.

There's no point me charging 3-figures for this information, if no-one is going to be able to afford it - thus meaning my blood, sweat and tears (not literally, of course) of research falls on deaf ears.

I mean, sure... there may be a few books similar to this one at double or triple what I'm asking for.

And sure, I could match their price and STILL outsell them - purely because of the fact that mine contains so much more useful material than theirs does.

But, why would I want to? Yes, the prospect of more profits is tempting.

But by doing that, the only thing I'll achieve is isolating the "little" guy.

Which is why I've priced it at a figure you'll find rather surprising.

That's why I've included an exclusive "Special Report" (especially for you) on page 25 that reveals the things you **MUST** look for when choosing the correct rod.
